The leap to Orange coincided with three significant management breakthroughs that gave us the modern corporation. First was the concept of innovation, which brought with it new departments such as R&D, product management, and marketing, as well as project teams and cross-functional initiatives. Second was accountability, which provided leaders with an alternative to commanding people: Give ...

The Future of Management Is Teal - strategy-business.com

Capability Management refers to activities that build organizational competency and capability in the organization, typically below the senior leadership levels. This process identifies organizational capabilities required to meet strategic goals and ensures continual alignment of employee development, career progression, and talent management to evolving business needs.
