The goal of this project is to create a multiple output cell phone charger for the DC House project. The cell phone charger is essentially a DC-DC converter. The converter takes an input of 48 volts from the outlet in the DC House and decreases the voltage level to 5 volts; the input voltage level of all cellular devices.

### **Cell Phone Charger for the DC House Project - Cal Poly**

The Cell Phone Charger kit is a portable device used to temporarily recharge your cell phone anywhere using a nine volt battery. An optional power adapter is available to use with an electrical outlet for a full charge.

Cell Phone Charger Circuit electronics. By Jayant Aug 11, 2015 91. Mobile phones generally charge with 5v regulated DC supply, so basically we are going to build a 5v regulated DC supply from 220 AC. This DC supply can be used to charge mobiles as well as the power source for digital circuits, breadboard circuits, ICs, microcontrollers etc.
