Premarket Notification [510(k)] Submissions for Chemical Indicators - Guidance for Industry and FDA Staff

Premarket Notification [510(k)] Submissions for Chemical

A bioindicator is any species (an indicator species) or group of species whose function, population, or status can reveal the qualitative status of the environment. For example, copepods and other small water crustaceans that are present in many water bodies can be monitored for changes (biochemical, physiological, or behavioural) that may indicate a problem within their ecosystem.

Chapter 4 Notes - Types of Chemical Reactions and Solution

The airspeed indicator (ASI) or airspeed gauge is a flight instrument indicating the airspeed of an aircraft in miles per hour (MPH), knots, or both. The ASI measures the pressure differential between static pressure from the static port, and total pressure from the pitot tube. This difference in pressure is registered with the ASI pointer on the face of the instrument.

Current Issue (PDF): For over 50 years, the Aldrichimica Acta has been an open-access, international forum for the frontiers of chemical research. It publishes topical and insightful reviews, written by prominent chemists from around the world and covering a variety of topics usually based on a synthetic theme in organic, organometallic, or bio-organic chemistry.
