

diarrhea after chemical stress pdf

Gulf War syndrome, officially known as Gulf War illnesses and chronic multisymptom illness, is a chronic and multisymptomatic disorder affecting returning military veterans and civilian workers of the Persian Gulf War of 1990 and 1991. A wide range of acute and chronic symptoms have been linked to it, including fatigue, muscle pain, cognitive problems, rashes and diarrhea.

Guideline for TherThermal Stressmal Stress

Chemical warfare (CW) involves using the toxic properties of chemical substances as weapons. This type of warfare is distinct from nuclear warfare and biological warfare, which together make up NBC, the military acronym for nuclear, biological, and chemical (warfare or weapons), all of which are considered "weapons of mass destruction" (WMDs). None of these fall under the term conventional ...

Premenstrual syndrome (PMS) is a combination of symptoms that many women get about a week or two before their period. Most women, over 90%, say they get some premenstrual symptoms, such as bloating, headaches, and moodiness. For some women, these symptoms may be so severe that they miss work or school, but other women are not bothered by milder symptoms.
